PROFESSIONAL SUMMARY

Data Science & Analytics student pursuing an Integrated MSc IT at JG University, targeting Data Analyst and Data Science internship roles. Hands-on experience building a customer-focused CRM web application and developing projects involving document processing, cloud services, data analysis, and custom compression/encoding. Skilled in Python, SQL, Excel, Power BI, Pandas, NumPy, and data visualization.

EXPERIENCE

Website Developer Intern | Finarray

December 2025 – April 2026

- Built a CRM web application from scratch to support customer management for insurance policies and mutual fund investments.
- Developed customer, insurance policy, and investment-record modules, plus dashboards, reports, search, filtering, and data tables.
- Implemented login/authentication, database integration, CRUD operations, and responsive UI layouts.
- Built an employee task page for customer follow-ups such as policy renewals and lead generation.

Technologies: HTML, CSS, JavaScript, React.js, Next.js, Python, PHP, Laravel, Firebase/Firestore, SQL

EDUCATION

Integrated MSc IT — Data Science & Analytics | JG University

2023 – Present | Currently in Semester V

Expected B.Sc. IT (Data Science & Analytics) qualification after Semester VI, around May 2027. Option to continue the integrated master's stage, with expected completion in 2029 if continued.

Semester SGPAs: Sem I 7.7/10 | Sem II 8.3/10 | Sem III 7.8/10 | Sem IV 8.0/10

Higher Secondary Certificate (HSC), Commerce | GSEB

Smt. K. N. Patel School, Ahmedabad | 2023–2024 | 83%

Secondary School Certificate (SSC) | GSEB

2021–2022 | 84% | 94th percentile

TECHNICAL SKILLS

Programming	Python, SQL, Java, C, C++, JavaScript
Data Analysis	Excel (formulas, PivotTables), Pandas, NumPy, EDA, data cleaning and preprocessing, statistics and probability
Visualization	Power BI, Tableau, Matplotlib, Seaborn, data visualization
Data Collection	Web scraping, API-based data collection
Web & Cloud	React.js, Next.js, HTML, CSS, PHP, Laravel, Firebase/Firestore, SQL, Supabase

SELECTED PROJECTS

Remonk Reminder | Completed

Document management application with document scanning/OCR, secure document storage, expiry reminders, and task management. Built with React/JavaScript and Firebase services, with Capacitor for Android and OneSignal notifications.

Demo: code-pal-launch.vercel.app | Domain: remonkreminder.com

VG-21C | Custom Compression & Encoding Engine

Implemented a command-line file encoding/decoding workflow using Brotli integration, Base-95 encoding, block-based byte-to-character mapping, and conditional compression when the compressed output is smaller. Includes benchmarking and iterative optimization experiments.

Repository: github.com/vansh2107/VG-21-engine

J.A.R.V.I.S. | Hybrid AI Desktop Assistant — Working Prototype

Windows desktop assistant exploring voice interaction, local and cloud AI integration, persistent memory, and smart tab management.

Repository: github.com/vansh2107/J.A.R.V.I.S

NEXUS AI | Resume & Portfolio Web Application — In Development

Developing a web application focused on resume and portfolio workflows.

Repository: github.com/vansh2107/NEXUS-AI

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati

Target roles: Data Analyst Intern, Data Science Intern

Professional profiles: GitHub | LinkedIn

Certifications can be added once located and verified.
